Journal of Membrane Science 91 (1994) 304–305

journal of MEMBRANE SCIENCE

Contents

Investigation of the gas-transport properties of polyaniline
S. Kuwabata and C.R. Martin (Fort Collins, CO, USA) 1
Facilitated transport of olefins in Ag^+-containing polymer membranes
W.S. Ho and D.C. Dalrymple (Annandale, NJ, USA) 13
A comparative study on thermal and hydrothermal stability of alumina, titania and zirconia membranes
C.-H. Chang, R. Gopalan and Y.S. Lin (Cincinnati, OH, USA) 27
Biofunctional membranes. Part IV. Active-site structure and stability of an immobilized enzyme, papain, on modified polysulfone membranes studied by electron paramagnetic resonance and kinetics
D.A. Butterfield, J. Lee, S. Ganapathi and D. Bhattacharyya (Lexington, KY, USA) 47
Manometric techniques for determination of gas transport parameters in membranes. Application to the study of dense and asymmetric poly(vinyltrimethylsilane) membranes
X.Q. Nguyen (Nancy, France), Z. Brož, F. Vašák (Prague, Czech Republic) and Q.T. Nguyen (Nancy, France) 65
Gas permeation characteristics of polymer–zeolite mixed matrix membranes
M.G. Süer, N. Baç and L. Yilmaz (Ankara, Turkey) 77
Gamma alumina nanofiltration membrane Application to the rejection of metallic cations
S. Alami-Younssi, A. Larbot, M. Persin, J. Sarrazin and L. Cot (Montpellier, France) 87
The effect of protein adsorption on ApoB removal and selectivity in plasma fractionation by membrane
C. Legallais, M.Y. Jaffrin (Compiègne, France) and J. Wojcicki (Warsaw, Poland) 97
Flowsheet simulation of ultrafiltration and reverse osmosis processes
H. Niemi and S. Palosaari (Lappeenranta, Finland) 111
Water vapor permeability and diffusivity through methylcellulose edible films
F. Debeaufort, A. Voilley (Dijon, France) and P. Meares (Exeter, UK) 125
The effect of channel height and channel spacers on flux and energy requirements in crossflow filtration
P.F. Levy and R.S. Earle (Beverly, MA, USA) 135
Flux decay and rejection during micro- and ultra-filtration of hydrophobically modified water-soluble polymers
R.J. Wakeman and G. Akay (Exeter, UK) 145
An elliptic filtration variation on Poiseuille-type laminar solutions of Navier–Stokes equations
C.S. Vassilieff (Sofia, Bulgaria) 153
Sorption and permeation of aqueous picolines in elastomeric membranes
S.A. Netke, S.B. Sawant, J.B. Joshi and V.G. Pangarkar (Bombay, India) 163
Theory of concentration polarization in cross-flow ultrafiltration: gel-layer model and osmotic-pressure model
G.A. Denisov (Moscow, Russian Federation) 173
Aroma compound recovery with pervaporation – the effect of high ethanol concentrations
H.O.E. Karlsson and G. Trägårdh (Lund, Sweden) 189
Properties of composite membranes prepared from ion exchange membranes and conducting polymers. V. Dependence of EMF of composite membranes prepared from anion exchange membranes and polypyrrole on relative humidity
T. Sata (Yamaguchi, Japan) 199

Rapid communication
Facilitated uphill transport of eicosapentaenoic acid ethyl ester through bulk and supported liquid membranes containing silver nitrate as carrier: a new type of uphill transport
M. Teramoto, H. Matsuyama, K. Nakai, T. Uesaka and N. Ohnishi (Kyoto, Japan) 209

Meetings calendar 215

1994 Elsevier Science B.V.
SSDI 0376-7388

Facilitated transport of ethene across polyelectrolyte gels with silver ions as a carrier
C. Richter and D. Woermann (Köln, Germany) 217
Electrical and chemical demulsification techniques for microemulsion liquid membranes
K. Larson, B. Raghuraman and J. Wiencek (Piscataway, NJ, USA) 231
Pervaporation induced by electric current
S.F. Timashev, V.V. Valuev, A.V. Vorobiev, R.R. Salem and A.J. Strugatskaya (Moscow, Russian Federation) 249
Photoinduced electron transfer properties of porous polymer membranes doped with the fullerene C_{60} associated with phospholipids
J.L. Garaud, J.M. Janot, G. Miquel and P. Seta (Montpellier, France) 259
Effect of evaporation step on macrovoid formation in wet-cast polymeric membranes
F.G. Paulsen (Boulder, CO, USA), S.S. Shojaie (Golden, CO, USA) and W.B. Krantz (Boulder, CO, USA) 265
Pervaporation of methanol–MTBE mixtures through modified poly(phenylene oxide) membranes
F. Doghieri (Bologna, Italy), A. Nardella (Roma, Italy), G.C. Sarti (Bologna, Italy) and C. Valentini (Roma, Italy) ... 283

Short communication
Use of the log-normal probability density function to analyze membrane pore size distributions: functional forms and discrepancies
A.L. Zydney (Newark, DE, USA), P. Aimar, M. Meireles (Toulouse, France), J.M. Pimbley (New York, NY, USA) and G. Belfort (Troy, NY, USA) 293
